

IN THE CLAIMS:

The status and content of each claim follows.

1-17. (cancelled)

18. (currently amended) A method for producing an object through solid freeform fabrication comprising:  
selectively depositing containment material to form a boundary structure with a high precision dispenser;  
depositing a flowable object build material into said boundary structure with a low precision dispenser;  
solidifying said flowable object build material;  
removing said boundary structure from said object build material after said solidification of said object build material;

~~The method of claim 17,~~ wherein said removing said boundary structure comprises melting said boundary structure.

19-56. (cancelled)
